9739303818 ◇ Karnataka, Bangalore

nidhi.43kumari@gmail.com ◇ <https://www.linkedin.com/in/nidhi-kumari-9126574a/>

OBJECTIVE

Several years of experience facilitating cutting-edge engineering solutions with a wide range of e-commerce application and technology skills. Proven ability to leverage full-stack expertise to build interactive and user centered website designs to scale. Extensive expertise in large system architecture development and administration, as well as network design and configuration.

EDUCATION

M.C.A, National Institute of Technology, Warangal (2014) 2011 - 2014

SKILLS

Technical Skills	Python, PHP, Django, Magento, MySQL, MongoDB, Redis, JavaScript, AWS, Microservices, GCP
Soft Skills	Communication, Problem-solving, Continuous learning

EXPERIENCE

Tech Lead AUGUST JEWELLERY PVT LTD (MELOORRA)	Jul 2019 - Present Karnataka, Bengaluru
---	--

- Handling multiple microservices like OMS, Customer system, BrownTape integrations for third party orders and catalog system.
- Worked on Django backend admin development from scratch to remove Magento admin.
- Worked on store POS creation for offline stores and mall integrations of various malls.
- Created numerous Django apps and extensively used Django session and cache management.
- Implemented the Golden Bounty Feature .

Senior Software Developer Savaari Car Rentals	Feb 2017 - June 2019 Karnataka ,Bengaluru
---	--

- Worked on FastTrack Availability project (Inventory system) which gives certain output to opt a particular vendor or not while allocating the booking.
- Mostly involved in Recommendation engine project to prioritize vendors based on some set of conditions.
- Currently i was evolved in full automation feature as well as worked for urgent booking cases and auto broadcasts.
- Optimized the Payment Process Flow to improve performance (confirmation as well as whole website)
- Worked on Alarms Dashboard to change and integrate new requirement, done lots of enhancement and query optimization.
- Worked on Driver App backend api.

Senior Software Developer LeEco	July 2016 - Jan 2017 Karnataka ,Bengaluru
---	--

- Worked on scrapy framework to crawl web pages and parsed data with non-blocking IO to scale the service.
- Worked with Hadoop map reduce for huge data on distributed file system.
- Worked on Recommendation service, to create user profile based on user interest and to track user click streaming.
- Analysed many algorithms for the classification of categories like SVM, FFT.

Software Developer Qwiksilver Solutions(PineLabs)	July 2014 - June 2016 Karnataka ,Bengaluru
---	---

- Worked on both B2B and B2C system for store-pos and eCommerce site and app.
- Created multiple api and script for third party integrations and StatHat dashboard integration.

PROJECTS

Parallel processing of multiple graph queries using map- reduce to handle the Big Data Problem,Analysed my project with millions of data (Java, Hadoop).

Search At Melorra, I implemented product search functionality using Typesense, an open-source search engine. Typesense offers fast and intuitive search capabilities, allowing users to quickly find products based on various criteria such as name, category, or attributes. Leveraging Typesense's efficient indexing and querying capabilities, I integrated it seamlessly into the Melorra platform, providing users with a smooth and responsive search experience. By utilizing Typesense's features, I enhanced the search functionality of the Melorra platform, improving user satisfaction and engagement.
